Autofac Configuration

Install this nuget package: Autofac.Extensions.DependencyInjection

Set following code below the line: var builder = WebApplication.CreateBuilder(args);

```
builder.Host.UseServiceProviderFactory(new
AutofacServiceProviderFactory());
builder.Host.ConfigureContainer<ContainerBuilder>(containerBuilder => {
containerBuilder
      .RegisterModule(new WebModule());
});
```

Create a module

```
public class WebModule : Module
{
      protected override void Load(ContainerBuilder builder)
      {
            builder.RegisterType<TestClass>().As<ITestClass1>()
                  .InstancePerLifetimeScope();

            builder.RegisterType<IndexModel>().AsSelf();

            base.Load(builder);
      }
}
```
